Relevant Experience

From September 2020 to August 2022

Software Engineer
HASudio China and San Francisco, US

Worked in a full-stack/devops team with a goal of boosting book sales in cloud using some of the latest technologies like Google Cloud Platform, Kubernetes + Istio, Java + Spring boot and React.

From May 2018 to May 2020

Fullstack Web Developer
Perfected App Remote

- Built a role based REST API, admin panel and client side web app for the online academy implementing features like purchasing and taking courses, completing exams and receiving grades.
- Rewrote the company WordPress website with React/GatsbyJS improving performance, security and SEO.
- Used Node.js to build the CLI automation tool for converting PDF books to JSON/Image based format used by internal platforms.

From April 2015 to April 2018

Full Stack Engineer
Upstatement Boston, MA

- Write modern, performant, and robust code for a diverse array of client and internal projects.
- Work with a variety of different languages, frameworks, and content management systems such as JavaScript, TypeScript, React, Vue, NativeScript, Node.js, Craft, Prismic, etc.
- Communicate and collaborate with multi-disciplinary teams of engineers, designers, producers, clients, and stakeholders on a daily basis

Projects

BookBeam

Web app built with Java Spring Boot, Wordpress and React for boosting book sales from Amazon, powered by Google cloud platforms and kubernetes.

Perfected App

Web agency website used to market app development services.
The website was initially built on WordPress platform but was later moved to React and GatsbyJS.

Freeroots

Web app built with React & Java Spring Boot for enabling ordinary citizens to create free grassroots political campaigns.
